DETAILED ACTION

1. Claims 1-2 and 4-5 are pending.

Allowable Subject Matter

2. Claims 1-2 and 4-5 are allowed.

The following is an examiner's statement of reasons for allowance:

3. With regards to claims 1-2 and 4-5, The present invention teaches a mobile device that indicates the authenticity of inquiries for confidential identity codes. Each independent claim identifies the distinct feature of generating an indication symbol in a second display zone when the inquiry is internally generated to indicate to the user that said inquiry is authentic. The closest prior art, Holmes and Wallent teaches teach methods of determining security zones of websites and a mobile device with a processor and a display. The prior art fails to teach the distinct feature of generating an indication symbol in a second display zone when the inquiry is internally generated to indicate to the user that said inquiry is authentic (see BPAI decision 5/15/2006 pages 6-8) and thus fails to anticipate or render the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
